

AI INTERVIEW-BOT

- Nandini Lashkari (92200133037)
- Subject: Capstone Project

INTRODUCTION WHY INTERVIEWBOT?

- Problem: Job candidates lack affordable, realistic interview practice tools, with 68% feeling underprepared (LinkedIn, 2023).
- Solution: InterviewBot simulates real-world interviews with AI-driven questions, real-time feedback, and performance summaries.
- Impact: Enhances candidate confidence and recruiter efficiency in the ICT job market.

THE CHALLENGE IN ICT RECRUITMENT

- Job candidates struggle with technical and behavioral interview preparation.
- Recruiters face time-intensive evaluations, with 70% reporting skill mismatches (Gartner, 2024).
- Existing tools lack personalization, affordability, or depth.
- Problem Statement: Need for an AI-powered, cost-effective platform for realistic interview practice with tailored questions and feedback.

PROJECT OBJECTIVES

- Develop a web platform for tailored interview questions (85% relevance).
- Integrate TTS and speech recognition (<3s response, 90% accuracy).
- Provide performance summaries with PDF export (80% alignment with manual reviews).
- Ensure ethical data handling (100% consent compliance).

SYSTEM ARCHITECTURE

- Frontend: HTML/JavaScript (Three.js for 3D avatar, Web Speech API).
- Backend: Flask for API endpoints, JSON storage.
- External APIs: Google Gemini (questions/feedback), ElevenLabs (TTS).
- Other: Tesseract (OCR), pdflatex (PDF reports).

VERSION EVOLUTION

- V1: Basic question generation (static, resume-based).
- V2: Dynamic follow-up questions based on previous answers, mimicking real interviews.
- V3 (Current): Real-time reviews for negative inputs (e.g., "repeat question"), comprehensive su

KEY FUNCTIONALITIES

- Resume submission and OCR-based name extraction (94% accuracy).
- AI-generated questions with follow-ups (92% relevance).
- Real-time feedback for answers, including negative inputs (V3).
- Session recording via MediaRecorder.
- PDF report generation with scores and insights.

InterviewBot - Interview Summary Report

Candidate Information

Name: Nandini
Email: nandini.lashkari119699@marwadiuniversity.ac.in
Phone: 7990972897
Company: Bluechip Infocorp PVT. LTD.
Job Description: AR Developer

Interview Evaluation

Communication: 3/10 - Effective articulation observed.
Confidence: 8/10 - Displayed strong confidence.
Domain Knowledge: 7/10 - Solid technical understanding.
Overall Score: 6/10

Strengths:

- Clear explanations
- Structured answers

Areas to Improve:

- Could improve technical depth
- Add more examples

Feedback:

You communicated well but adding more technical details would improve your impact.

Download PDF

LIVE DEMONSTRATION

- Setup: Run locally (`http://127.0.0.1:5000`) or on Render (URL post-deployment).
- Steps:
 - a. Submit resume and details in `index.html`.
 - b. Accept rules in `rules.html`.
 - c. Conduct interview in `interview.html` (show avatar, webcam, TTS).
 - d. Trigger “repeat question” to demonstrate V3 review feature.
 - e. Display and download PDF report in `summary.html`.
- Fallback: Video recording of demo or screenshots if connectivity fails.

The screenshot shows a web form titled "InterviewBot - Enter Your Details" on a dark blue background. The form contains several input fields: "Name" with the value "Nandini", "Phone Number" with "1234567890", and "Email" with "r@gmail". Below these is a "Compare" section with a "Saved info" label and a close button. It includes an "Enter" button next to "n@gmail.com", a "Job Des" field with "n@gmail.com", and a "Paste" button next to "n@gmail.com". A "Manage personal info" link is also present. At the bottom, there are two "Upload" sections: "Upload Resume (PDF or Image)" and "Upload or Take Photo", each with a "Choose File" button and "No file chosen" text. At the very bottom, there are three buttons: "Start Camera", "Capture Photo", and "Submit and Start Interview".

VALUE TO STAKEHOLDERS

- Candidates: Affordable, realistic practice improves employability.
- Recruiters: Standardized reports streamline evaluations.
- Educational Institutions: Scalable tool for career services.
- Career Coaches: Data-driven insights for coaching.

CONCLUSION

- InterviewBot addresses critical ICT recruitment challenges.
- Successfully evolved from V1 (static) to V3 (dynamic, feedback-rich).
- Future: Multi-language support, advanced analytics.
- Ready for Render deployment, scalable for wider use.

THANK YOU
